SUMMARY

Full-stack developer and product designer with 3+ years of experience shipping web and mobile products, from Figma designs to live Google Play apps. Currently building React Native (Expo) apps at Mirchi35, with two Android apps in production. Founder of eMenu, a digital menu SaaS, and co-founder of Auralion Labs, a product studio. Focused on AI-powered features, agentic workflows and rapid prototyping with React, Next.js and Node.js.

SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Material UI, GSAP, Motion

Mobile: React Native, Expo, Expo Router, Redux Toolkit, i18next, Ionic, Capacitor, Google Play Console

Backend & Databases: Node.js, Express.js, REST APIs, JWT Authentication, Supabase, PostgreSQL, Prisma, MongoDB, Firebase, Firestore, Sanity CMS, Stripe

AI & Automation: Agentic AI, Google Agent Development Kit (ADK), Gemini, Python, AI/ML, n8n, Prompt Engineering, AI-assisted Development

Design: Figma, UI/UX Design, User Flows, Design Systems, Prototyping

Tools & Deployment: Git, GitHub, Docker, Postman, VS Code, Vercel, Netlify, Hostinger, Google Cloud Run

WORK EXPERIENCE

Associate MERN Stack Developer & Test Engineer

Nov 2025 - Present

Mirchi35 Private Limited, Bangalore

- Designed and built **Mirchi35 Studio**, a live local-discovery Android app where vendors post real-time updates, deals and offers, taking it from Figma UI/UX to Google Play launch.
- Built **Mirchi35 Community Connect**, a multi-language community Android app (i18next), owning UI/UX, frontend, API integration and Play Store deployment.
- Set up the frontend architecture for both production apps using React Native, Expo Router, Redux Toolkit and Axios.
- Configured Expo projects and Android builds, and managed releases through Google Play Console.
- Developed the Mirchi35 website with Next.js, TypeScript, Tailwind CSS and Motion, focused on responsive UI and performance.
- Tested and debugged both apps and the website to production quality.

Freelance Full-stack Developer & UI/UX Designer

Present

Self-employed, Part-time

- GT-Five:** designed the UI/UX of the brand's Android app in Figma (user flows, screens, visual system), plus its logo, posters and banners.
- Vakya:** designed and built the landing page for a daily Bhagavad Gita lock-screen app using Next.js, GSAP and Motion, including a full redesign.
- Turn product requirements into working, responsive interfaces, from user flows to final build.

Frontend Programmer (MEAN Stack)

Nov 2023 - Feb 2025

Ants Applied DataScience Pvt Ltd

- Built the **Ants Portfolio Analyzer**, a financial analytics platform for large-, mid- and small-cap stocks with portfolio risk analysis, optimization tools and interactive dashboards.
- Implemented a subscription model for premium analytics access.
- Converted the Portfolio Analyzer web app into an Android app using Ionic and Capacitor.
- Built IoT monitoring dashboards for **Solar Data Lake**, a real-time solar plant monitoring platform, including customer management and admin access control.
- Developed customer and admin interfaces and integrated REST APIs across products.

- Analyzed restaurant order data using R scripts for statistical analysis and visualization.

Assistant Software Programmer (Intern)

Mar 2023 – Oct 2023

Ants Applied DataScience Pvt Ltd

- Cleaned, preprocessed and standardized data for AI/ML projects.
- Built and integrated REST APIs to support data-driven applications.

PROJECTS

eMenu: Digital Menu SaaS (Founder)

emenuweb.com

Tech: Next.js, React, Tailwind CSS, shadcn/ui, Supabase, Prisma, Stripe

- Founded and built a digital menu platform that lets restaurants and cafés publish menus via QR code and update prices instantly, with no reprinting.
- Built a drag-and-drop menu builder, a branded customer menu with search, filters and multi-language support, and a business dashboard with analytics.

Auralion Labs: Product Studio (Co-founder)

auralionlabs.com

Tech: Next.js, React, Tailwind CSS, shadcn/ui, GSAP, Motion, Sanity CMS, Figma

- Co-founded a studio that builds AI products, web and mobile apps, automation systems and SaaS platforms.
- Designed in Figma and built the company website with responsive layouts, motion, a Sanity CMS blog and Cal.com call booking.

Wren: Agentic Healthcare Assistant (Hackathon)

All Things Agentic Hackathon

Tech: Gemini, Google ADK, Python, Cloud Run, Firestore

- Team-built an AI agent that runs patient check-in at GP clinics, asks follow-up questions and writes intake to the chart, plus a clinician console with a 30-second brief and a triage-sorted queue.
- Redesigned the patient check-in and clinician screens, and added speech input and chat composer improvements.

image-π: Privacy-First Browser Image Toolkit

Tech: React, TypeScript, Canvas API, Web APIs

- Built a client-side toolkit for compression, format conversion (PNG, JPEG, WebP, AVIF), cropping, resizing, filters and watermarking, with no server uploads.
- Added background removal, EXIF stripping, Base64 conversion, QR code and favicon generation, and color palette extraction.

Oryx AI: AI Training Data & Model Evaluation Platform

Tech: Node.js, React, Python, Tailwind CSS

- Built a platform providing training datasets and evaluation tools for AI/LLM models, with preprocessing pipelines, format conversion and performance analytics.
- Implemented API-based data access and a credit-based usage system.

EDUCATION

Bachelor of Computer Applications (BCA), AI & Machine Learning

Sep 2024 – 2027 (Expected)

Manipal University Jaipur (Online)

Diploma in Computer Science & Engineering

Nov 2021 – May 2023

S J Government Polytechnic | GPA: 9.0/10

CERTIFICATIONS

- HTML, CSS, and JavaScript for Web Developers – Johns Hopkins University (Coursera)
- Developing Cloud Apps with Node.js and React – IBM (Coursera)
- AI for Everyone – DeepLearning.AI (Coursera)
